

ACOUSTIC

Our functional knitted fabrics bring sound absorption and aesthetic into harmony and improve the life of living and working.

The desire for quietness and comfort is becoming more and more important not only in private life but also at work. Unpleasant sounds, or noise, in the workplace are increasingly perceived as stressful. In addition to this current design and building trends in the modern architecture, which make it more difficult of appropriate acoustic conditions. Acoustic curtains can considerably reduce resonance and they are true noise absorber.

OUR ACOUSTIC QUALITIES IN COMPARISON

Air flow resistance acc. DIN EN 29053

There are many possibilities to influence room acoustic with the help of textiles. They can be used as curtains, room separators, wallcovering and ceiling suspension.
