

## FINISHING

Today's textiles not only look good and feel good, swisstulle AG also gives them additional features and functions. With our wide range of mechanical and chemical equipment, we provide modern and innovative materials. We guarantee with confidence specified requirements and refine them to durable and high quality products.

Thanks to our modern machinery and the many years of experience of our employees, we give your textiles character.

## TECHNICAL TEXTILES

swisstulle AG has been present in the worldwide market for technical textiles for more than 35 years as a manufacturer and supplier of knitted fabrics.

Our strength is customer-specific developments and the versatility in our offer. By integrating the individual operations – yarn preparation, knitting, specialized finishing – we are able to produce a wide range of high-quality and pollution-free knitted fabrics made of natural, synthetic and high-tech fibers.

In each department trained professionals are available to implement the specific requirements and specifications. By linking the individual departments, we are able to respond quickly (just in time) and specifically to customer requests (just in quality). Quality and flexibility in production and logistics are the focus here.

### WE OFFER YOU TECHNICAL TEXTILES FOR THE AREAS OF

## SWISSTULLE AG

More than 100 years of experience have made us what we are today: one of the continental market leaders for traditional, genuine bobbinet tulle and knitted fabrics for a wide variety of market segments.

At the eurocentric location in Switzerland, we develop and produce innovative, high-quality knitted fabrics and tulle for our customers worldwide. In addition to our manufacturing know-how and a high level of development expertise, we have great innovative strength. Highest quality, reliable delivery and absolute customer satisfaction are among the characteristic features of our company.

With our technical textiles, we meet the highest demands from the industry. In doing so, we play a key role in ensuring that our customers are successful with their products.

Headquarter  
Münchwilen, Switzerland

Subsidiarys in  
Switzerland, England and China

## KNITTING

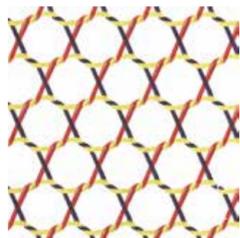

We produce technical textiles and a comprehensive product portfolio of different knitted fabrics on warp knitting machines and an electronic double-bar raschel machine for 3D spacer in various widths.

From technical fabrics for the automotive and transport sector, as well as heavy-duty nets in demanding technical applications. From knitted fabrics in the contract market and theater area to patterned net lace for fashion, embroidery and the lingerie industry.

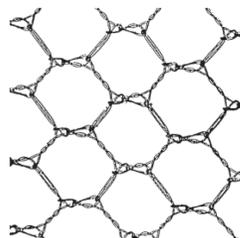

Our net lace is produced in Switzerland and China.

## BOBBINET – NET LACE

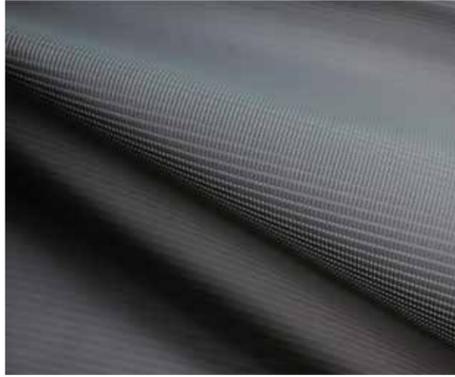

The real bobbinet tulle is a woven fabric, although it resembles a knitted fabric in its hexagonal hole shape. Its dimensional stability is incomparable. Using spun, high-quality natural yarns or synthetic filament yarns opens up many possibilities in a market that is becoming increasingly specialized. Bobbinet Tulle is produced exclusively by swisstulle UK plc in England, the largest and oldest manufacturing facility in the world in this specialty.

## MOBILTECH

As a longterm manufacturer and supplier for the transportation industry we fulfill the high technical standards of the OEM's.

- Sun shades and screens
- Wind deflectors and windscreens
- Safety nets and dividers
- Luggage nets
- Nets for literature pockets

## INDUTECH

For our customers in the fields of mechanical engineering, industry and electrical engineering, we jointly develop high-tech knitted fabrics tailored to the respective customer requirements.

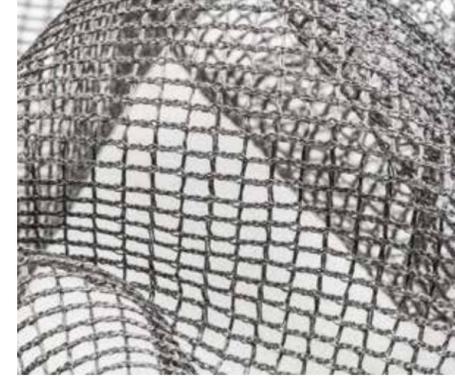

- Knitted fabrics for electrical insulators
- Coating carriers for conveyor belts
- Conductive knitted fabrics
- Spacer fabrics with function
- Filtration mesh

## PROTECH

Our high-tech knitted fabrics have been specially designed for personal protection and for use in military and security applications. They meet the highest demands of modern protective textiles.

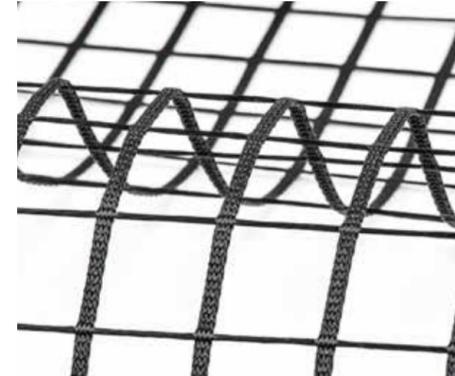

- Fabrics for personal protective equipment
- Fabrics for professional workwear
- Base for camouflage nets
- Insect protection solution
- Fabrics for shielding

## BUILDTECH

In the field of construction and architecture we offer technical knitted fabrics with high functionality and long durability.

- Steel/basalt knitted fabric for concrete reinforcement
- Reinforcing mesh & spacer
- Glare protection
- Carpet second back

## GEOTECH

Textiles are used in gardening and landscaping, but also in civil engineering, earthworks or traffic route construction. We can offer you our development services for this purpose.

- Erosion protection and reinforcement nets
- Geofilter nets
- Geogrids

## AGROTECH

A wide range of protective nets is used in the field of agriculture, heliculture, environment and industry. We offer food nets, certified according to (EU) 10/2011 Annex II. Development potential for further textiles is at your disposal.

- Covering textiles for early harvesting
- Insect protection
- Shading fabrics
